PROFESSIONAL SUMMARY

AI Solutions Consultant with 3+ years of experience in Applied AI, Data Science, and designing enterprise AI solutions across Generative AI, Agentic AI, ML & Retrieval-Augmented Generation (RAG). Experienced in translating business requirements into scalable AI solution designs, conducting technical discovery, assessing solution feasibility, and leading the delivery of AI initiatives from concept and rapid prototyping through production deployment. Combines consulting expertise with hands-on AI & ML engineering to bridge business and technology, delivering scalable, cost-effective AI solutions while collaborating with cross-functional teams and stakeholders.

AREAS OF EXPERTISE

- **Strategy & Solution Architecture:** AI Solution Blueprinting & System Design · AI Strategy · Discovery Workshops · Stakeholder Facilitation · Responsible AI Governance · Executive Reporting
- **AI Solution Development:** Conversational AI · Generative AI · Agentic AI Systems · Retrieval-Augmented Generation (RAG) Graph RAG · Model Fine-tuning & deployment · AI Evaluation Frameworks · Prompt Engineering
- **Cloud & Tech Stack:** Azure AI Foundry · ML Studio · AWS Bedrock · GCP · Google Gemini · OpenAI API · Claude Code · Anthropic API · Hugging Face Transformers · Microsoft CoPilot · LangChain · Databricks · Neo4j · Terraform (IaC) · Python SQL · Git · Computer Vision Models · Machine Learning.
- **Technical Delivery:** AI Solution Architecture · Proof of Concept (PoC) to Production · Development · MLOps · Systems Integration · Workflow Automation · Performance & Cost Optimisation.

PROFESSIONAL EXPERIENCE

AI Solutions Consultant · Version 1

2026 - Present

AI Ticket Classifier

- Designed an AI-powered ticket classification solution, that automated support ticket triage across **20+** managed service client accounts, reducing revenue leakage risk and supporting a **€2.33M revenue recovery opportunity**.
- Led client discovery workshops and cross-functional stakeholder alignment, translating business requirements into scalable AI solution designs, prioritising technical requirements, and driving successful production delivery.

Agentic IaC App

- Architected an agentic AI platform for a **£100K client engagement**, enabling natural language-to-Terraform generation with policy-compliant infrastructure scaffolds and **reducing** engineering effort by an estimated **40 hours per sprint**.
- Authored technical blueprints, production implementation roadmaps and ROM estimates, validating architecture decisions through iterative client demonstrations.

Data Scientist (Applied AI) · Version 1

2023 - 2026

- **Key client engagements** spanned **25+** enterprise and public sector organisations across the **UK, Ireland & USA**, including Companies House, Dublin Airport Authority, Kerry Group, JPMorgan, Red Bull and Dubai Aerospace Enterprise, designing and delivering AI solutions aligned to client business objectives.

RAIA: Responsible AI Advisor

- Architected & built an Agentic RAG assistant that cuts compliance review time from **2-3 days** of manually analysing **500+** pages of regulatory guidance to **under 5 minutes** by applying region-specific **Responsible AI frameworks** to provide evidence-backed compliance gap analyses and recommendations.
- Owned the end-to-end technical architecture, selecting Azure OpenAI and LangChain, designing modular ingestion, retrieval, agent tools orchestration, and explainability pipelines to create a reusable architecture adaptable across multiple enterprise AI governance use cases.
 - Key achievement: shortlisted as a finalist for **Best Use of Responsible AI & Ethics at the 2025 AI Awards Ireland**.

TNMOC Mate

- Enhanced visitor accessibility and engagement at **The National Museum of Computing (UK)** by designing & developing an AI-powered museum guide application using Azure AI services, prompt engineering and AI video generation, delivering personalised tours across **30+** exhibits in **15+** languages through QR-code interactions.

- Key achievement: recognised as a finalist from **4,700+** global submissions for the **2024 Microsoft Inclusion Changemaker Partner of the Year Award**.

Neuro-Symbolic AI – KBQA System

- Achieved **96% accuracy** across **1,000+** multi-hop evaluation queries and outperforming traditional RAG approaches, by architecting a Neuro-Symbolic AI solution for enterprise knowledge retrieval over complex document collections.
- Owned end-to-end architecture, designing reusable pipelines spanning document preprocessing, entity-relation extraction, model fine-tuning on **1M+** text records, knowledge graph construction, Graph RAG retrieval and evaluation, enabling adaptation across diverse enterprise use cases.

LEADERSHIP & STRATEGIC CONTRIBUTION

Shadow Board Member · Version 1

2024 - 2025

- Appointed to Shadow Board, a select cohort of emerging leaders sponsored by the People Director & CTO.
- Contributed to 8 strategic initiatives over 12 months spanning workforce strategy, employee experience, inclusion, market expansion and customer success, representing the next generation's perspective in organisation-wide decisions.

EDUCATION

Master of Science in Computer Science (M.Sc. CS)

Oct 2022

Ranked 1st in the University · Gold Medallist · CGPA 10/10 · The National College, Bangalore University, India

Bachelor of Science in Computer Science (B.Sc. CS)

Sept 2020

Percentage: 95% · Government First Grade College, Kuvempu University, India

CERTIFICATIONS

- Microsoft Certified: Azure Data Scientist Associate (DP-100)
- Microsoft Certified: Azure AI Fundamentals (AI-900)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- AWS Certified Cloud Practitioner (CLF-C02)
- Claude Certified Architect - Anthropic
- Google Data Analytics Specialisation - Coursera
- AI for Product Management
- AI For Everyone - Coursera

INTERESTS & VOLUNTEER WORK

- Mentoring on processes, AI, technical aspects, client interactions and demo preparation.
- Learning new and upcoming technologies.
