PROFESSIONAL SUMMARY

AI Solutions Consultant with 3+ years of experience in Applied AI & Data Science, specialising in AI strategy & solution design. Experienced in leading discovery workshops, engaging executive stakeholders, developing business cases & building AI solutions from concept to production. Combines consulting expertise with hands-on delivery across Generative AI, Agentic AI & RAG, including rapid prototyping, technical feasibility analysis, performance and cost optimisation, to accelerate enterprise AI adoption and deliver measurable business outcomes.

AREAS OF EXPERTISE

AI Consulting: AI Strategy & Adoption · Discovery Workshops · Stakeholder Facilitation · Business Case Development · Responsible AI Governance · Proposal support · Executive Reporting

AI Solution Development: Conversational AI · Generative AI · Agentic AI Systems · Retrieval-Augmented Generation (RAG) · Graph RAG · Model Fine-tuning · AI Evaluation Frameworks · Prompt Engineering

Cloud & Tech Stack: Azure AI Foundry · ML Studio · AWS Bedrock · GCP · Google Gemini · OpenAI API · Claude Code · Anthropic API · Hugging Face Transformers · Microsoft CoPilot · LangChain · Databricks · Neo4j · Python · SQL · Git · Computer Vision Models.

Technical Delivery: Proof of Concepts (PoC) to Production · MLOps · Workflow Automation · AI Solution Architecture · Performance & Cost Optimisation.

PROFESSIONAL EXPERIENCE

AI Solutions Consultant · Version 1

2026 - Present

AI Ticket Classifier

- Reduced revenue leakage risk across managed services by delivering an AI-powered ticket classification solution, automating support ticket triage across **20+ client accounts**, supporting a **€2.33M revenue recovery opportunity**.
- Facilitated client discovery workshops & coordinated cross-functional stakeholders across business and engineering teams to define the AI solution, align priorities and drive successful delivery.

Agentic IaC App

- Architected and built an agentic AI platform for a **£100K client engagement**, automating natural language-to-Terraform generation with policy-compliant infrastructure scaffolds, **saving** an estimated **40 engineering hours per sprint**.
- Accelerated execution by producing technical blueprints, production implementation roadmaps and ROM estimates, using iterative client demonstrations to validate the solution.

Data Scientist (Applied AI) · Version 1

2023 - 2026

- **Key client engagements** included **25+** enterprise and public sector organisations across the **UK, Ireland & USA**, including Companies House, Dublin Airport Authority, Kerry Group, JPMorgan, Red Bull and Dubai Aerospace Enterprise, contributing to the design, development and demonstration of AI solutions tailored to client requirements.

RAIA: Responsible AI Advisor

- Reduced compliance review time from **2-3 days** of manually analysing **500+** pages of regulatory guidance to **under 5 minutes** by architecting an Agentic RAG assistant that applies region-specific **Responsible AI frameworks** to provide evidence-backed compliance gap analyses and recommendations.
- Developed a reusable AI framework using LangChain and Azure OpenAI, engineering modular pipelines for document ingestion, vector search, agentic reasoning and explainable response generation, creating a scalable architecture adaptable to diverse enterprise use cases.
 - Key achievement: shortlisted as a finalist for **Best Use of Responsible AI & Ethics at the 2025 AI Awards Ireland**.

TNMOC Mate

- Enhanced visitor accessibility and engagement at **The National Museum of Computing (UK)** by engineering an AI-powered museum guide application using Azure AI services, prompt engineering and AI video generation, enabling personalised tours across **30+** exhibits in **15+** languages through QR-code interactions.

- Key achievement: recognised as a finalist from **4,700+** global submissions for the **2024 Microsoft Inclusion Changemaker Partner of the Year Award**.

Neuro-Symbolic AI – KBQA System

- Achieved **96% accuracy** across **1,000+** multi-hop evaluation queries, outperforming traditional RAG approaches, by architecting a Neuro-Symbolic AI pipeline that enabled enterprise knowledge retrieval over complex document collections.
- Built an end-to-end scalable and reusable pipeline covering document preprocessing, entity-relation extraction, model fine-tuning on **1M+** text records, knowledge graph construction, Graph RAG retrieval and evaluation, enabling adaptation across diverse enterprise use cases.

LEADERSHIP & STRATEGIC CONTRIBUTION

Shadow Board Member · Version 1

2024 - 2025

- Appointed to Shadow Board, a select cohort of emerging leaders sponsored by the People Director & CTO.
- Contributed to 8 strategic initiatives over 12 months spanning workforce strategy, employee experience, inclusion, market expansion and customer success, representing the next generation's perspective in organisation-wide decisions.

EDUCATION

Master of Science in Computer Science (M.Sc. CS)

Oct 2022

Ranked 1st in the University · Gold Medallist · CGPA 10/10 · The National College, Bangalore University, India

Bachelor of Science in Computer Science (B.Sc. CS)

Sept 2020

Percentage: 95% · Government First Grade College, Kuvempu University, India

CERTIFICATIONS

- Microsoft Certified: Azure Data Scientist Associate (DP-100) | Claude Certified Architect - Anthropic
- Microsoft Certified: Azure AI Fundamentals (AI-900) | Google Data Analytics Specialisation - Coursera
- Microsoft Certified: Azure Fundamentals (AZ-900) | AI for Product Management
- AWS Certified Cloud Practitioner (CLF-C02) | AI For Everyone - Coursera

INTERESTS & VOLUNTEER WORK

- Mentoring on processes, AI, technical aspects, client interactions and demo preparation.
- Learning new and upcoming technologies.
